Unshielded Twisted Pair (UTP) Cabling Systems

MRJ21 Connector System

MRJ21 to MRJ21 Cable Assemblies, Unshielded

FEATURES:

- Factory terminated and tested solution
- Modular, pluggable solution
- Dense CHAMP style double blade design with offset jackscrew
- Contact layout and footprint for differential pairs creates reduced crosstalk and built-in compensation
- 1.5 to 4 times the port density of 2 x 6 Stacked Mod Jack (RJ-45)
- 3 times the port density of an RJ-21
- Jackscrew for positive latching and secure cable retention
- Reduced Diameter option for better cable management
- Ultra Slim option for better cable management

Fiber Optic (FO) Cabling Systems

System Cables

Indoor Distribution, 36-72 Fiber (OFNR, PVC)

FEATURES:

- Suitable for horizontal and in-building backbone cabling and for direct termination with epoxy/polish, LightCrimp, LightCrimp PLUS and MT-RJ jacks
- Hybrid cables (with Singlemode and multimode fibers) are available to provide a built-in migration path for future applications that will require Singlemode fibers
- Strippable 900 µm tight buffer coating allows for easy connectorization
- TIA color-coded fibers for easy identification
- UL and cUL listed OFNR (Riser)
- Outer Jacket Color:
 - Singlemode: Yellow
 - 50/125 and 62.5/125 µm Orange
 - XG 50/125 µm Aqua (OM3, OM4)

Zip Twin Cable (LSZH)

FIRE PERFORMANCE

Sheathing materials for internal cables comply fully with the following standards:

ASPECT

Flammability
Smoke Emission
Acid Gas Emission
Toxicity

NORM

IEC 60332 Parts 1 and 3
IEC 61034 Parts 1 and 2
IEC 6075 Parts 1 and 2
NES 713

FEATURES:

- Low Smoke Zero Halogen (LSZH)
- Available buffer designs: Tight-Buffer or Easistrip
- Fiber categories: OM1, OM2, OM3 (XG), OM4, OS2
- Tight buffer versions suitable for TE Connectivity Quick Termination Products
- Easistrip suitable for fusion splice and epoxy techniques

Indoor Distribution Cable (ULSZH)

FEATURES:

- Universal Low Smoke Zero Halogen (ULSZH)
- For indoor and outdoor applications
- Suitable for backbone and Fiber-to-the-Desk
- Increased strength and durability
- Tight-Buffer construction
- Suitable for all termination techniques
- Fiber categories: OM1, OM2, OM3 (XG), OM4, OS2
- Available fiber count: 4-48
- Option: water swelling E-glass yarns providing rodent resistance and moisture protection

Internal/External Loose Tube Cable 4-144 Fiber (LSZH)

FEATURES:

- Low Smoke Zero Halogen (LSZH)
- LDPE sheath upon request
- For indoor and outdoor applications
- For use in ducts applications
- Non-metallic with peripheral strength members
- Water swelling E-glass yarn (moisture protection)
- Dry core technology applied for fiber count more than 12
- Loose tube construction
- Suitable for all termination techniques

Fiber Optic (FO) Cabling Systems

System Cables

Outside Plant (OSP) Figure 8, 4-144 Singlemode Fiber

FEATURES:

- A self supporting optical cable in a figure of 8 configuration, for aerial installation on poles (except power lines)
- Suitable for maximum 80 meters span routes, minimum sag 0.5% (worst weather condition 108km/hour wind speed, no ice)
- Recommend figure 8 cables shall be installed with a full twist, approx every 7-9 metres, to avoid Galloping.
- Jelly filled loose tubes and cable core
- UV-protected jacket for outdoor environment
- TIA color-coded fibers and buffer tubes for easy identification
- Outer Jacket Color is Black

Fiber Optic (FO) Cabling Systems

MPOptimate System

MPO/MPOptimate installation and polarity

In each fiber optic system, the link from source (Tx) to receiver (Rx) needs to be flipped once.

In a complete MPO/MPOptimate link this flipping is provided by one flipped cassette, while all other components in this link shall be installed as straight version.

MPOptimate ready for 10, 40 and 100 Gb/s

The MPOptimate system is designed to support 10G Ethernet and 4/8G Fiber Channel applications through the complete structure of a Data Center, as specified in ISO/IEC 24764, EN 50173-5 and TIA/EIA 942. The MPOptimate system is designed to have 6 cassettes per link for 10 Gb/s with a full 300 meter support on OM3 fibers and 550 meter on OM4 fibers.

It offers one passive channel from the end equipment to the core switch without the need of repeating signals for amplifying reasons. When using the MPOptimate cabling system, the owner can replace aggregation switches by a patch cord without changing the passive infrastructure.

The system offers already today a fully 40 and 100 Gb/s capability and seamless migration.

Fiber Optic (FO) Cabling Systems

MPOptimate System

MPOptimate pre-terminated trunks

FEATURES

- Cable terminated with low loss 12 fiber MPOptimate connectors
- Terminated with female MPO connectors (male versions on request)
- OM3 or OM4 cable performance, LSZH construction
- Connector performance: IL $\leq$ 0.35 dB (max.); RL $\geq$ 28 dB
- The trunks are equipped with midi fan-out and round cable MPO tails protected with transparent protection sleeve
- Factory pre-terminated assemblies
- All cords with protocol, for constant and reliable quality
- Available in 12 fiber or 24 fiber (other fiber counts on request)
- Packaging: < 50 m in box, $\geq$ 50 m on reel
- Re-usable pulling socks can be ordered separately. Part Number 0-2055567-1

MPOptimate to LC Quick-Fit cassettes

FEATURES

- Pre-terminated low loss cassettes
- Front: 6 x optimized LC Duplex or 6 x optimized LC Quad
- Back: 1 or 2 low loss MPOptimate connector(s)
- Available in straight or flipped pair version
- Optical performance in OM3 and OM4:
IL $\leq$ 0.35 dB/cassette (max.)
RL $\geq$ 27 dB
- Fits in TE Connectivity Quick-Fit patch panels with maximum density of 4 cassettes per 1 U
- Port number labeling and additional label strip included

CORELINK Mechanical Splice

MECHANICAL QUICK TERMINATION

The CORELINK splice is easy to use, high performance mechanical splice for 125 µm singlemode and multimode fibers. Its unique clamping mechanism is activated with a simple key, no other tool is required. The splice is remateable-either fiber can be removed and replaced in the splice at any time.

FEATURES:

- No fusion splice necessary
- Torsion resistant
- Bellcore TR-765 tested
- For multimode and singlemode
- For tight buffer, semi tight and loose tube
- For 250 µm coating and 900 µm buffer
- Cleaving tool see page 183

FEATURES:

- A quality cleaver with a cutting angle of 8°
- A capacity of 20000 cleaves
- An integrated storage system of fiber cut-offs
- Tool-controlled positioning of the cleaved fibers into the splice
- Fully mechanical – no power or batteries
- Maintenance-free and no adjustment requirements
- Does not require usage in controlled environments
- Robust, compact and light
- Can work with very short fiber lengths
- Designed for right-handed and left-handed installers
- Tool dimensions: 155 x 160 x 140 mm (L x W x H)
- Weight: 1.4 kg/2.2 pound
- Comes in a protective case with mounting plate

LightCrimp Splice

- Terminates 250 µm coated, 900 µm tight-buffered, and
- 2.0 mm jacketed fibers
- Use with multimode and single-mode 125 µm diameter fibers
- No epoxy, set-up, or workstation required
- Use Termination Tool Kit part number 1553212-1, See Chapter 22
- Splice Performance Characteristics:

Attenuation: Typical 0.1 dB

Return Loss: (at ambient: 18 to 28° C)

>20 dB Multimode

>35 dB Singlemode

Operating Temperature:

-25 to 70° C

Sealed Circular LC ODVA

FEATURES:

- IP67 rated to ensure protection from dust and water immersion
- LC connector qualified to Telcordia GR-326 and TIA/EIA 568B.3
- Temperature range of -40 °C to 85°C
- Bayonet-style mechanical lock
- Flame retardant materials per UL 94 V-0

APPLICATIONS:

- Harsh environments where chemicals, corrosive gases and liquids are commonplace
- Inside and outside industrial plant and equipment that interface with industrial Ethernet networks
- Remote interface applications such as towers and antennae as well as FTTX in PON and at the home applications
- Mobile routers and internet hardware

PoE Equipment

Power over Ethernet (PoE) according to IEEE 802.3af defines the simultaneous provision of low voltage and Ethernet data signals over a cabling system compliant to the ISO/IEC 11801 standard. Now, remote devices like VoIP phones, W-LAN Access Points, security devices and much more can be powered remotely.

COMMON FEATURES:

- Supports 10/100/1000 MBit/s Ethernet
- Allows the insertion of power into as many as 8 (8 port version) or 24 outlets (24 port version)
- IEEE 802.3af compliant

24 Port PoE Gigabit Midspan Unit

FEATURES:

- 24 Port PoE Midspan Unit
- 19" rack mountable
- Universal 110/220 V (50/60 Hz) power supply
- Supports pre-standard CISCO PoE devices (PoE converter needed)
- Managed option available

- 19" rack mountable (with mounting frame)
- Universal 110/220 V (50/60 Hz) power supply
- Full power on every port (15.4 W)
- Up to 3 devices can be mounted into a 19", 1 U mounting frame
- Supports pre-standard CISCO PoE devices (PoE Converter needed)

Ethernet LAN Solutions

Ethernet Media Converters

Media Converters support all current Ethernet standards and enable easy extension of 10Base-T, 100Base-TX and 1000Base-T RJ-45 LAN circuits from routers, switches, NICs and other Ethernet devices over optical fibers. This allows greater distances to be covered or, for example, the connection of two workgroups. Support for single fiber WDM also available.

COMMON FEATURES:

- Easy Plug-and-Play installation
- Auto negotiates the required data rate
- Auto-MDI/MDI-X detection – eliminates cross-over cables
- Increased network resilience through Link Loss Forwarding
- Both SM and MM supported
- Single fiber WDM converters supported
- Rack mountable
- External main power supply and rack mount kits are provided

10/100 MBit/s Ethernet Media Converter

FEATURES:

- 10/100 MBit/s RJ-45 Copper port
- Auto-MDI/MDI-X detection
- 100Base-FX fiber port
- Dimensions: 85 x 120 x 26 mm (W x D x H)

SNMP Managed Media Converters

This range of fully managed Media Converters support all current Ethernet standards and enable easy extension of 10Base-T, 100Base-TX and 1000Base-T RJ-45 LAN circuits from routers, switches, NICs and other Ethernet devices over managed optical fibers. Located in a 19" chassis system they are ideal for telecom and corporate applications where a number of fiber links need to be managed and controlled from a central location.

COMMON FEATURES:

- Easy Plug-and-Play installation
- Auto negotiate the required data rate
- Auto-MDI/MDI-X detection – eliminates cross-over cables
- Increased network resilience through Link Loss Forwarding
- Both SM and MM fibers supported
- Single fiber WDM converters supported
- Rack mountable
- AC and DC PSUs supported
- 16 individual Plug in cards supported
- Management by Console, Web or SNMP

SNMP Managed Ethernet Converter Card

FEATURES:

- 10/100/1000 MBit/s RJ-45 Copper port
- Auto-MDI/MDI-X detection
- Full configuration via managed chassis
- 100Base-FX fiber port
- Link loss forwarding
- Range of fiber optic ports
- Supports TS1000 functionality

Ethernet Compact Switches

These un-managed switches are simple plug-and-play units that can be used “straight from the box”. This makes them ideal for local workgroups, small offices and SOHO applications. Some switches have either a fixed or optional fiber uplink port to enable high-speed connections to backbones, servers and NIC cards.

Common Features:

- 10/100/1000 MBit/s RJ-45 copper ports (UTP/STP)
- Auto-negotiation
- Auto-MDI/MDI-X detection – eliminates cross-over cables
- Easy Plug-and-Play installation
- LED's display switch status

5 Port Compact Ethernet Switch

FEATURES:

- 5 RJ-45 Copper ports
- All 5 ports up-linkable via auto-MDI/MDI-X detection
- 10/100/1000 MBit/s
- External power supply provided
- Dimensions: 164 x 100 x 26 mm (W x D x H)

Ethernet LAN Solutions

Ethernet Smart Switches

These high performance Ethernet smart switches are ideal for linking small workgroups or departments to remote servers or routers using the 100 MBit/s uplink port. These are simple to use plug-and-play devices and can be used "straight from the box". In addition these smart switches can be configured using the local RS232 console port to control functions such as VLAN assignments and port enable/disable modes.

COMMON FEATURES:

- 10/100 MBit/s RJ-45 copper ports (UTP/STP)
- Auto-negotiation
- Auto-MDI/MDI-X detection – eliminates cross-over cables
- LED's display switch status
- Manageable via RS232 console port
- Management allows Ports and VLANs to be controlled and duplex modes set
- Internal AC auto-ranging power supply

8 Port 10/100 MBit/s Smart Switch With Integrated Fiber Uplink

FEATURES:

- 8 RJ-45 Copper ports + 1 fiber uplink port (100Base-FX)
- Dimensions: 250 x 132 x 37 mm (W x D x H)
- Weight 1.0 kg
- Fits 10" racking

Ethernet SNMP Managed Switches

These easy to install, high performance switches support SNMP, VLANs and Quality-of-Service. This capability is ideal for network managers who want to have full control of their network and plan to implement these switches in distributed workgroups.

COMMON FEATURES:

- 10/100 MBit/s RJ-45 copper ports (UTP/STP)
- Auto-negotiation
- Auto-MDI/MDI-X detection – eliminates cross-over cables (not on 16 port version)
- Easy Plug-and-Play installation
- LED's display switch status
- Manageable via RS232 console port and web browser
- Management allows Ports and VLANs to be controlled and duplex modes set
- Spanning Tree Protocol support
- Internal AC auto-ranging power supply

8 Port 10/100 MBit/s SNMP Smart Switch With Integrated Fiber Uplink

FEATURES:

- 8 RJ-45 Copper ports + 1 fiber uplink port (100Base-FX)
- Dimensions: 250 x 132 x 37 mm (W x D x H)
- Weight 1.0 kg

8. Video Distribution System

Introduction.....	202
VDS Components	203

Video Distribution System

Introduction

True High Definition RF and IP Video over Cat 6 or 7 twisted-pair cabling

TE Connectivity's Video Distribution System (VDS) enables the delivery of video signals such as: cable television, satellite, in-house video, digital signage, electronic bulletin board or any other service normally delivered over coax systems but over twisted-pair cabling. The VDS eliminates the need for a separate coax infrastructure or the need for RF technician to install it.

VDS is a TIA-568/ISO 11801 compliant solution for delivering broadband RF signals over an existing structured cabling infrastructure.

Supports Up to 862 MHz RF Signals

Support full-spectrum video (862 MHz) for up to 90 meters or 550 MHz for up to 100 meters.

Intelligent Self Adjusting Balun

Provides amplification and equalization with Auto Gain Control (AGC).

Plug & Play - No Setup Required

Output and input levels are adjusted to provide perfect HD video at the TV set.

FEATURES

- Supports RF video and IP Video over a single Cat 6 or 7 twisted-pair cable.
- Capability to support in excess of 65,000 video drops.
- Truly Plug-n-Play with Auto Gain Control (AGC)
- System automatically adjusts the head-end signal for proper system operation.
- Eliminates the need for manual tuning, solving coax's equalizing and balancing problems electronically.
- Ease of system design/maintenance
- Bi-Directional Signal - compatible with Interactive Control requirements
- Future-proofs your network for the movement to IPTV

VDS Components

Master RF Video Interface

FEATURES

- No set-up required – plug-and-play
- Automatic RF gain and slope adjustment
- Eight coax output ports to drive VDS Hubs
- Auxiliary ports for use with in-house RF video
- LED indicator lights

Description	Part Number
Master RF Video Interface (N Variant)	2-2111501-0
Master RF Video Interface (P Variant)	1-2111501-0

Video Distribution Hub

FEATURES

- No set-up – automatic gain and slope control.
- Supports full-spectrum video as well as 10/100Base-T
- Available in 12 and 24-port versions
- Four (4) coax output ports to drive other VDS Hubs
- LED indicator lights

Description	Part Number
Video Distribution Hub (N) 24-port	2-2111510-0
Video Distribution Hub (P) 24-port	1-2111510-0
Video Distribution Hub (N) 12-port	2-2111505-0
Video Distribution Hub (P) 12-port	1-2111505-0

Intelligent, Self-Adjusting Balun

FEATURES

- Plug-and-play utilizing AGC (Automatic Gain Control)
- Provides two output ports – F connector for RF and RJ-45 for 10/100Base-T
- No external power supply – powered via twisted pair cable
- Small size (2.5" x 2.5" x 1") (59 mm x 57 mm x 24 mm)

XG_A 10 Gb/s Approved

High-speed 10 Gigabit Ethernet over Twisted Pair and Fiber Optic Cabling

The AMP NETCONNECT XG Systems, comprising Cat. 6 Copper and OM3 Fiber products have become firmly established industry-leading portfolios with excellent 10 Gb/s performance.

As transmission and connectivity technologies have progressed, TE has developed new products which exploit these technological advantages: our AMP NETCONNECT XG_A Systems include our Cat. 6_A Copper and OM4 Fiber portfolios to become the next generation, end-to-end 10 Gb/s infrastructure solutions. They are fully compliant with the latest ISO/IEC 11801 Amendment 2 specifications.

The **XG_A 10 Gb/s approved** seal is an indicator for all products of the XG_A family.

ISO Cat. 6_A

A new Category 6_A specification has arrived

All products in this catalog that feature the **ISO Cat. 6_A** seal are compliant with the global cabling standard ISO/IEC 11801 Amendment 2.

This amendment defines new specifications for Cat. 6_A components and Class E_A permanent links. These global Cat. 6_A / Class E_A specifications require a new generation of connecting hardware offering far superior performance compared to the existing products which are based on the American TIA standard.

Benefits of this higher standard include more headroom, "mix & match" capability, enabling short links, and removing the requirement for ANEXT testing.

Pyramid Tested

The Conformity and Quality Trademark for Real Cat. 6 Component Performance

All products in this catalog that feature the PYRAMID TESTED logo totally comply with the de-embedded testing requirements of the standards TIA / EIA 568 B.2-1 (UTP & STP), IEC 60603-7-4 (UTP) and IEC 60603-7-5 (STP). Accordingly these products fulfill the performance requirements of Cat. 6 for components which guarantees interoperability and backward-compatibility between products.

During development and production these products are tested with a worldwide standardized test setup, heart piece of which is a pyramidal test head. This exactly defined shape guarantees repeatability of the results. Most significant advantage for end-users is a wide range of system- and vendor-independent patch cords suitable to reach Cat. 6.

Ensured Performance

Optimized Physical Contact (OPC) enhances your link parameters

Why do you require a controlled ferrule end face? Enhanced services such as Gigabit, 10 Gigabit and soon 40/100 Gigabit Ethernet require a high quality cabling system. Therefore, IEC 608749 specifies the dimensional details of fiber optic connectors in order to ensure interoperability and performance within an ISO 11801 specified application. These dimensional requirements are directly related to the endface characteristics of a polished ferrule, namely its radius, dome offset and fiber position.

If these ferrule characteristics are optimal, an Optimized Physical Contact (OPC) between the two connectors is guaranteed. This will enhance data transmission parameters like optical performance, Attenuation, Return Loss and data link stability.

Also, the optical interoperability between connectors of different suppliers can be ensured by controlled endfaces. As a result of OPC a stable physical contact between the endfaces is achieved. This provides a very low Insertion Loss as well as a high Return Loss in order to run high speed applications like 10/40/100 Gigabit Ethernet. All products in this catalog that feature the Ensured Performance logo provide OPC at all time. AMP NETCONNECT guarantees a controlled endface for all OM3, OM4 and OS2 assemblies and field installable products (MT-RJ and LightCrimp Plus).

Universal Connectivity Platform

Rack efficiency and multiple media deployment

The Universal Connectivity Platform (UCP) is designed to deliver rack efficiency and multiple media deployment. It comprises a versatile range of components that include patch panels, subfloor panel and overhead panel mounts, pre-terminated links and adaptor modules. One common patch panel, either angled or flat, is used to accommodate both copper and fiber, and the units can be installed within or outside the 19-inch envelope. Side mounting brackets maximize usable space along the vertical posts of the rack system, while adaptive mounting brackets can be used strategically above and below the racks.

The UCP accepts pre-terminated copper looms, fiber cassettes and MRJ21 high density copper connectivity cassettes, for faster deployment and high reliability. It is also fully compatible with TE Connectivity's AMPTRAC managed connectivity solution.

Products which are used inside the Universal Connectivity Platform are marked with the **UCP Compatible** seal.

RoHS Ready

Restriction on the Use of Hazardous Substances

TE Connectivity will support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where required in the process of eliminating the restricted materials. All part numbers in this catalog are RoHS compliant. These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

NOTE: For purposes of this catalog, included within the definition of RoHS Compliant are:

- Products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories.
- Products that contain lead in solderable interfaces (they do not contain any of the other five restricted substances above allowable limits). However, these products are covered by an application-based exception for lead in solders, such as the server, storage, or networking infrastructure exemption of the same directive.

NOTE: Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change.

Twenty-five years from now, you'll thank us.

We are confident that your AMP NETCONNECT system will keep performing to current industry standards. If ever it does not meet those standards within 25 years of the date of installation, we'll provide the reasonable parts and labor to replace or repair the AMP NETCONNECT product.

- 25 years coverage on system performance
- 25 years coverage on components
- 25 years coverage on applications
- Based on industry standards
- Includes parts and labor
- TE Connectivity provides coverage directly to the end user— if something is wrong, TE Connectivity will make it right

It's Standard Equipment

This coverage is automatically part of the package when*:

- TE Connectivity products are specified end-to-end
- A TE Connectivity-authorized Networking, Design & Installation (ND&I) contractor registers the network project with TE Connectivity
- That ND&I performs the actual installation in accordance with TE Connectivity requirements

Who's Covered

Unlike most system suppliers, TE Connectivity provides warranty coverage directly to the end user.

Many suppliers provide coverage to the installers, who then provide coverage to the customers. But with the TE Connectivity warranties, there are no middlemen. The warranties are between you and TE Connectivity.

Which means if something goes wrong, we'll fix it.
