

# TA350DC

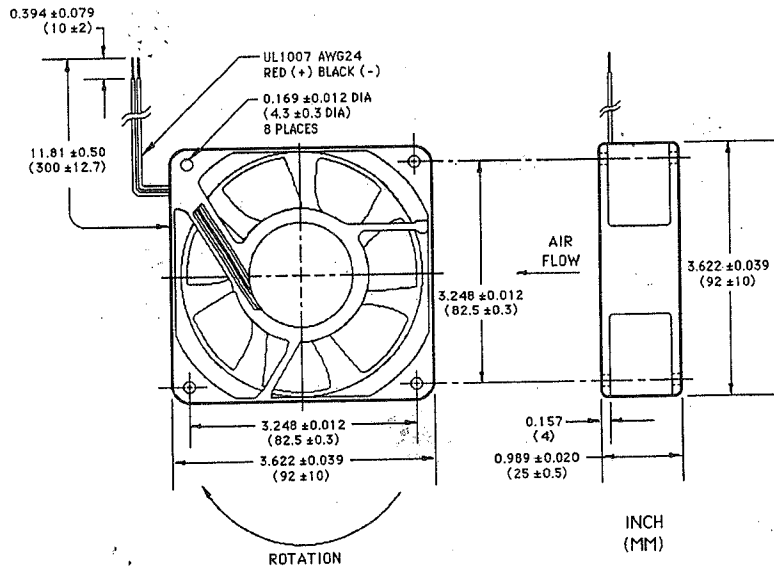

TA350DC is a series of brushless dc fans that quietly delivers up to 62 CFM from advanced aerodynamic impellers and 3.62-inch (92mm) thermoplastic frames. The fans are available with a thermal sensor for

automatic speed control based on the temperature of the air stream or the thermal performance of a remote component. Models shown here offer air flow ratings of 28 to 42 CFM at operating voltages of 12V or 24V.

## FEATURES

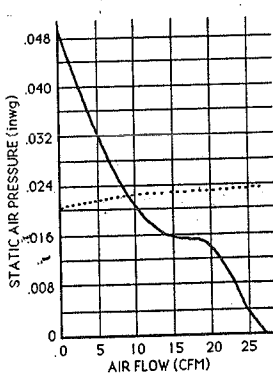

- 12V and 24V Models
- Polarity Protected
- Permanently Lubricated Ball Bearings
- UL Recognized, CSA Certified
- Optional Thermally Managed Speed Control and Impeller Rated UL 94V-0
- Solid State Brushless DC Motor with Permanent Magnet Rotor, Electronic Commutation with Hall Effect Sensor
- Color-Coded 11.8 in. (300 mm) Leads
