<b>TAPE</b>	T-DR-25	36	24

- <sup>1</sup> Shelf Life when stored properly in original unopened packaging, out of direct sunlight and at normal room temperature typically not exceeding 23°C, unless otherwise noted. Short-term temperature & humidity excursions whilst still not exceeding 35°C & 75% relative humidity (RH), will not affect the performance of the product. These are guidelines only and test data cannot be provided to validate this.
- <sup>2</sup> Storage conditions 18 - 35°C as per SAE-AMS-DTL-23053.
- <sup>3</sup> Shelf life referenced exceeds Mil-spec requirement. SAE-AMS-DTL-23053 imposes a shelf life statement on the certification as well as the labelling of the product whether or not the product is subjected to deterioration when stored correctly.

## REVISION HISTORY

Author	Approved	Date	Rev	Comments
P. Hammond	M. Pope	05JUL17	A	Table reformatted. Additional products included. Supersede 'SHELF-LIFE' document.
P. Vu	M. Pope	23JUL17	B	S1006 shelf life amended based on kits. VPB shelf life amended. Notes modified.
P. VU	H. Smith	18JAN18	C	RTS-1360621 - Added FRAG tubing.
