The High Energy Series is our large tab-leaded and wire-leaded varistors. They are available in round and square shapes. These varistors are available in 25mm, 32mm, 34mm, 40mm, and 53mm configurations including single and dual designs. They are available with maximum continuous operating voltages (MCOV) ranging from 130VAC to 1000VAC (up to 1500VAC upon request). The High Energy Series is designed for pulse repetition and/or very large surge current environments. Numerous tab forms are available for all sizes, with limited wire led options.

The Maida Style Number is the typical means to identify our components when ordered. The style number identifies several parameters that are important for the characteristics of the device. An alternative ordering method, if known, is by our Item Number. The following example is the standard part numbering system when ordering our HE Series components by the Maida Style Number:

**D 78 80 ZOV 131 RA 21**

**Coating Designation**

- D – Standard Epoxy Coating
- P – Phenolic Coating
- S – Square Disc Epoxy Coating
- PS – Square Disc Phenolic Coating
- None – Denotes no conformal coating.

**Nominal Sizes**

- S66 - 25mm Square
- 78 - 32mm
- S75 - 34mm Square
- 75 - 40mm
- 77 - 53mm

**Lead Configuration**

**Material Identifier**

Zinc Oxide Varistor
