

# COMBICON Cable Housings

These ergonomically designed cable housings serve as strain relief for the conductors connected to the plugs.

This is achieved for conductors from 4 to 13.5 mm Ø by a clamp or a cable binder in the housing.

The way the cables are guided means several plugs can be placed in rows directly beside each other. MSTB/IC and GMSTB plugs, with and without screw flange, with a metric or inch pitch, can be used in connection with the cable housing.

## KGG-MSTB 2,5/...

2-8 positions, with straight cable connection

## KGS-MSTB 2,5/...

8-24 positions, with angled cable connection

Description	No. of positions	Dim a [mm]
<b>Cable housing</b> , for cable diameters of 4-6 mm cable binders and marker strips are enclosed, color: green	2	10
	3	15
	4	20
<b>Cable housing</b> , for cable diameters of 5-9.5 mm, cable binders and marker strips are enclosed, color: green	5	25
	6	30
	7	35
	8	40
	8	40
<b>Cable housing</b> , for cable diameters of 6-13.5 mm, transparent label carriers and marker strips are enclosed, color: green	9	45
	10	50
	11	55
	12	60
	13	65
	14	70
	15	75
	16	80
	17	85
	18	90
	19	95
20	100	
21	105	
22	110	
23	115	
24	120	

(1) **Transparent label carrier**, can be marked with marker strips SBS 2,5/7,5

(2) **Marker strips**, 10-section, perforated, white plastic, **unprinted** for individual labelling, lettering area 15 x 7.5 mm

(3) **Moulded cable strain relief**, suitable for KGS-... cable housings, prevents the cable from being squashed

KGS-MSTB 2,5/16	GMSTB 2,5/11
KGS-MSTB 2,5/18	GMSTB 2,5/12*

\* In the pitch direction, the cable housing is approximately 2 mm wider than the plug connector strip

### Type of housing

ABS, see page 263  
color: green

The combination possibilities for the cable housings with inserted plug and the COMBICON pin and socket strips are documented in the cross-reference list on pages 82 to 85.
