APCRBC118-PW
REPLACEMENT
BATTERY CARTRIDGE

RESTORE THE LIFE OF YOUR UPS SYSTEM WITH OUR REPLACEMENT BATTERY

The APCRBC118-PW UPS Replacement Battery Cartridge is designed to bring UPS systems back to reliable operation when internal batteries become weak or fully discharged. It features a 120V battery that meets or surpasses original equipment standards. Built with sealed, non-spillable lead-acid technology, the battery is maintenance-free and does not require fluid refills. The cartridge arrives fully assembled for fast, straightforward installation in compatible UPS units. It is packaged in a reusable box that can be repurposed for safely transporting used batteries to a certified recycling facility. The APCRBC118-PW also includes recycling guidance and is supported by a two-year limited warranty. Our replacement batteries are suitable for use as alternatives to APC batteries in compatible UPS systems.

FEATURES
